

XM is the best radio that i have seen yet. It offerers more variety then the local stations, clearer then locals, i travel alot and this radio saves from getting tired. Why do we want to sit in traffic and listin to what is going on, and what if we do not know the area, then we have to find the station and sit and wait for who knows how long. If this bill passes it is taking more and more of our freedoms away thanks to corporate america.
